

Here's How You Win With An Annual Preventive Maintenance & Energy Saving Agreement.

No Worries

- We'll make sure your system is operating safely, so your family is not at risk.
- A properly maintained system will be less likely to break down in the heat of Summer or the cold of Winter.

No Hassles

- We'll be responsible for keeping your system running...you have enough to do.
- We send out reminders twice a year for you to call and schedule service.

More Money

- A properly maintained and tuned system will cost less to operate.
- It's better to catch small problems before they become expensive repairs.

More Time

- We'll schedule an appointment for maintenance when it's convenient for you.
- If you do need us for emergency service we're always available...we never close!

More Choices

- You can choose to be involved in our basic heating and cooling maintenance plan, or add filters and humidifiers.
- We can replace your system with a new Trane system when you need one.

2022 Maintenance Plan Rates

- | | |
|--------------------------------|------|
| • Gas Fired Furnace | \$89 |
| • Electric Furnace/Air Handler | \$89 |
| • Air Conditioner Or Heat Pump | \$89 |
| • Humidifier Pad & Check | \$38 |
| • 5" Pleated Media Filter | \$42 |

Service You Can Depend On!

Skilled Technicians

We're available to solve your heating & cooling problems 24 hours a day. "If we can't fix it, it isn't broken!" All of our service engineers receive ongoing training in heating & air-conditioning and are EPA certified. Furthermore, our service engineers have experience ranging from 10 years to over 40years. We're sure you'll be impressed with anyone from our company who works for you!

Flat-Rate Pricing

On residential work we charge on a flat-rate basis where we charge by the job-not by the hour. We charge a diagnostic fee to send a service engineer over to check out your system and determine the cause of the problem. Once we find the problem we can give you a price to repair the problem out of our Flat-Rate Pricing Guide. This way you'll know the cost every step of the way. We'll even give you a **One-Year Warranty** on the work we do.

Maintenance Agreements

The current investment is \$178 per year for an agreement covering one furnace and air-conditioner. When you own one of our agreements we'll see you in the spring to check the ac unit and again in the fall to check your furnace. Should you need service during the year we give a 10% discount on repairs and don't charge you overtime rates after hours. A properly maintained home comfort system will operate cheaper, last longer, heat and cool better and provide for better comfort in the home. Safe operation will also be verified. We recommend annual maintenance....
